1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5 and 12, drawn to method for assignment of variable bandwidth for transmission, classified in class 370, subclass 468.
 - II. Claims 6-11 and 13, drawn to method for allocating traffic, classified in class 370, subclass 351.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions. In the instant case the different invention have different modes of operation, different functions, and they have different effects.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification because of their recognized divergent subject matter, and the search required for each Group I or II is not required for other Group, restriction for examination purposes as indicated is proper.

2. A telephone call was made to Mr. Jay S. Cinamon on January 29, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.
